

PERFORMANCE ON THE CULMINATION DAY

AMAZING ANIMALS AROUND US.

ISSUE DATE:-
30th
November, 2017

Collaborative Activity (India Australia)

By, ANAYA WAGLE

ISA activity on amazing animals around us was not only with reference to learning about the habitat, life cycle and food habits of different animals around us, but furthermore it was a thought provoking activity for kids to understand that animals have soul and have all the rights to live in this world just like humans.

The aim of the project was to study the varieties of indigenous animals found in India and Australia with regards to their habitat, population, issues concerning them, raising awareness and taking care of them

To begin with information about animals in India and Australia was given through power point presentation, followed by project that helped them to understand the animals of the two countries their habitat, lifecycle and food habits in detail, they also made mask and said few lines on each one of them that helped them to get under the skin of different animals and be sensitive towards their feelings.

Field trip to National Park was arranged to feel the beauty of the nature

A talk show on Kids for tiger was arranged so that they understand the plight of tigers as they are at the brink of extinction and how to save them.

Children collaborated with the Australian schools. The students of both the schools gathered information about the animals pertaining to the respective country on the basis of a survey sheet given on **"Threats faced by the animals of both the countries"** which was sent to the partner school via email.

After repeated request to the partner Australian school we could not get the video conferencing done due to their busy schedule, this did not stop us here we approached multiple school and requested them for the same but unfortunately the schools did not revert back

Finally the **culmination of this ISA activity** was a huge hit with the parents as children performed awareness skit- wherein the children raised awareness across the different grades and amongst the parents about the issues/threats faced by the wildlife especially because of human activities (deforestation, industrialization, poaching etc). They also had a small rally and pledge along with the parents to spread the message of love for the endangered species and help to save them.

Outcome- gained complete knowledge about the indigenous animals found in the chosen countries. They learned to evaluate the present condition of the animals and how to appreciate the gift of nature and save wild life

KIDS FOR TIGER -
Sensitizing kids to love
the voiceless.

FIELD TRIP- Nature is
the art of God.

MASK MAKING-- Live
and let Live.

AWARENESS SKIT- Lets
end cruelty to all animals.

PLEDGE -Plant more
trees and save wild life.
