

T.I.S. Active Environmentalists

As a part of their SUPW project, the students of Grade 9 and 10 have been maintaining a Vermiculture Pit since June 2016 in the school premises. They have nurtured and cared for this project with great zeal and commitment. We are proud to announce that this project has yielded 246 Kgs. of compost, around 60% of which has been distributed to farmers in Maharashtra with the help of Aniruddha's Academy of Disaster Management. Our industrious students are significantly contributing to the environment and society, thereby making the world a better place to live in!!
