

Workshop on 'Kids for Tiger'

In association with sanctuary Asia and Aircel

Date: 9th of August, 2016.

Time: 9.30am- 1.30pm

Venue: Eros Cinema, Churchgate. Mumbai

Resource Person:

Dr. Deepak Apte- Director BNHS(Bombay Natural History Society)

Volume 3 Issue 3

Dr. Parvish Pandya (Associate Professor (Zoology, Bhavans College) a consultant with Sanctuary Magazine & Teacher Trainer.

The workshop started with an awakening Audio video clip on Tiger and their territory and the result of the invasion of human.

A brief description about the objective of conducting this workshop with the educators and facilitators was given thereby introducing the resource person Dr. Deepak Apte and Dr. Parvish Pandya and their contribution in this field followed by the Lamp lighting illuminating our minds for the seriousness therein.

Dr. Deepak Apte, took our attention on the various alarming threats to the nature because of Human factors(Urbanisation, deforestation, Pollution etc) and as a result by non Human factors (Draught, Floods, Cyclones, Melting glaciers Sea rise etc) and the effect of it on the life of animals eventually getting them in the list of endangered/ Extinct animals

Dr. Parvish Pandya highlighted on the camps and nature trails conducted at school levels. Group activity was also conducted, giving distinct objectives to each group and the ways to strategise it in the school level.

The strategizing session was extremely successful getting teachers wholesome involvement and putting forth their ideas and suggestions.

August 2016

Overall the experience was very altruistic. I am very thankful to my Principal and the school authorities for giving me a chance to be a part of it. I will try my best to share and impart the knowledge I gained to my fellow mates and the students bringing a desired change.

Independence Day celebration was preceded by an Art and Craft competition, theme being creating art or craft using the colours of the Indian flag. Students were judged on their creativity, content appropriateness and neatness. All the children got busy in giving their best.

What did they do in Thar and Arabian Desert?

Dental and Medical Checkup

An investigation on “Comparing the characteristics of Sand and Soil” in Science was carried out in order to recognise the difference between the two materials. The students had to observe the sand and soil carefully and report the dissimilarity in their colour, texture and the place where it is found etc.

The Pole star and Algol star

The grade 1 students are now more or less well settled and they follow instructions and carry out the activities.

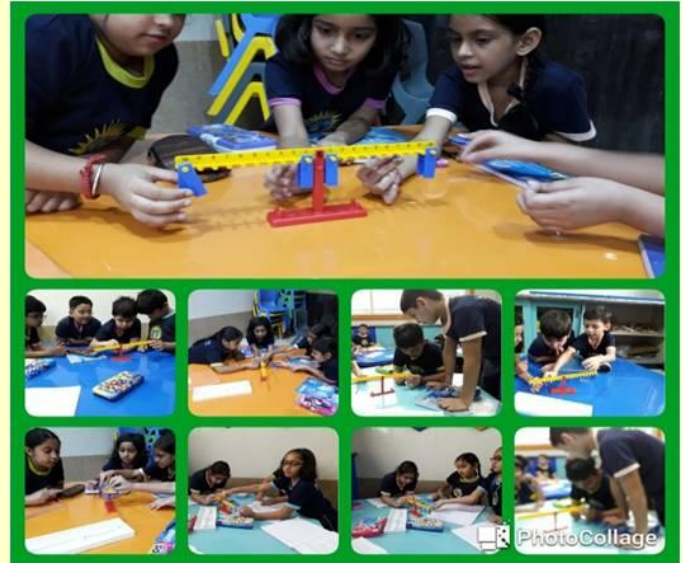

Needs and wants Compare and decide:

Now At The Peaks:

Students presented their findings of the civilization through charts and models

Traditional Tale – Preparing a Multilingual Poster named ‘BEGINNINGS AND ENDINGS’, displaying different scripts for story openings and endings.

The concepts of associative and commutative properties were demonstrated using a number balance. Learning is also “minds on” as it is “hands on”. Students were encouraged to think critically using NUMBER BALANCE

academic year. The Principal and the Secondary Coordinator attend these conferences and invite the counselors to our school. We have also sent our students to attend workshops organized by such global institutions.

Our students had participated in the essay writing workshop conducted in Global Pathways Institution.

It is our earnest endeavour to put the students' feet on a global platform and prepare them for the same.

The ORT workshop

MS. Priya Natraj the primary coordinator and MS. Tejal attended the 1 day ORT workshop organized by Oxford Publishers UK.

The Oxford Reading Tree includes books for graded reading from K-10. There are different genres for reading for the secondary students. The workshop focused on reading skills and the rubrics the teachers need to use for improving and evaluating the students in preprimary and primary classes.

Role Play on 'How does one respect public property?' (Hospital, parks, Toilets, monuments etc.) inculcating sense of responsibility towards the society

University Guidance Conference

As much as the international curriculum plays an important role in seeking the admission to an international board across the globe, guiding the students to select their career goals and selection of subjects become very important. Keeping this in mind, TIS (CIE) have always exposed the students to talks by admission counselors from different universities in UK and US. There had been at least 15 such universities who have visited our school in the last
